PROFESSIONAL SUMMARY

Junior Full Stack Web Developer with formal training in Web Application Development (DAW) and hands-on experience building full stack applications. Skilled in JavaScript, TypeScript, Node.js, Express.js, Angular, REST APIs, and SQL databases. Currently expanding knowledge of React and Node.js, with a strong interest in continuing to grow professionally in web development.

PROFESSIONAL EXPERIENCE

Web Developer — Internship | Mediasurgroup, Chiclana, Spain — *September 2025 - December 2025*

- Developed a business data management application connected to a database.
- Built features to search company, workplace, and employee records, including filters by name, date, ID number, and other fields.
- Implemented create, update, and delete functionality based on user role and permissions.
- Developed the frontend with Angular and integrated it with an existing PHP backend.
- Adapted web applications for mobile devices using Angular, Ionic, Capacitor, and Android Studio, including the existing project "Controla tu Tiempo" (Time Tracker).

EDUCATION

Higher Technical Degree in Web Application Development (DAW) | IES Fernando Aguilar Quignon — *Completed December 2025*

Technological Baccalaureate | Isla de Leon — *Completed 2022*

TECHNICAL SKILLS

- Frontend: JavaScript, TypeScript, HTML5, CSS3, Angular, React
- Backend: Node.js, Express.js, REST APIs, JWT, MVC
- Databases: MySQL, Sequelize
- Tools: Git, GitHub, Docker, Postman
- Mobile: Ionic, Capacitor, Android Studio

PROJECTS

Hair & Beauty Salon Management System | Angular, TypeScript, Node.js, Express, MySQL, Docker

- Full stack application for comprehensive salon management, built on a three-tier architecture and deployed with Docker.
- Booking system with availability filtering by staff member, service, schedule, and time off.
- Authentication with JWT and role-based access control.
- Product, cart, sales, and stock management, including PayPal integration in a test environment.
- REST API structured using the MVC pattern with a relational MySQL database.

Task Manager — Full Stack Application | React, Vite, Node.js, Express, REST API

- Full stack task management application, with a React frontend and a REST API backend built with Node.js and Express.
- Create, update, complete, and delete tasks.
- Frontend-to-API communication over REST.
- Handling of loading and error states in the user interface.
